

# A-System Aviation Authority Documents

Imagine a web site where you can find the information about the most important documents issued by the most important aviation authorities of the world; where you can check day by day which rule or directory has been or is proposed to be issued affecting your activity or which economical reports that help you in the definition of your

Company strategy; a web site fully free-of-charge where you can download the documents directly from the authority web site, check historical data, search documents on key words, subscribe to be notified by e-mail on the new issues of the documents of your interest. All in just a single page.

This is Aerocom A-System. You can access it with your browser from <https://www.aerocomsystem.com>

Currently it monitors 14 authorities plus one private organization, IATA, and 25 document types for a total of 47 different combinations. The authorities taken in account are the most important in the world like FAA and EASA and those of the main regions that offer English version web site.

**Authority**

- ANAC Brasil
- CAA China
- CAA New Zeland
- CAA South Africa
- CAA UK
- CAB Japan
- CAD Hong Kong
- CASA Australia
- DGCA India
- EASA
- European Commission
- FAA
- GCAA UAE
- IATA
- TCA Canada

	<b>EASA Airworthiness Directive</b> AD 2020-0174 AIRBUS A318 A319 A320 A321 Wings – Outer Flaps and Tabs – Identification / Inspection (improper heat treatment) / Replacement (wrong material)	2020/08/06	
	<b>CASA Australia Airworthiness Notice</b> AWB 52-004 Issue 1 Cessna 441 in Flight Depressurisation due to Emergency Exit door bonded skin failure	2020/08/06	
	<b>TCA Canada Airworthiness Directive</b> CF-2020-26 Bombardier Inc. model BD-100-1A10 aeroplanes ATA 27 - FLIGHT CONTROLS – MULTI-FUNCTION SPOILER (MFS) FAILURE TO DEPLOY	2020/08/05	
	<b>IATA Economic Report</b> Fuel Price Analysis - 31 July 2020	2020/08/05	
	<b>FAA Type Certificate Data Sheet</b> P36EA Rev. 26 Hartzell Propeller, Inc. HC-33Y PHC-33Y	2020/08/05	

Data are updated daily by our base in Malaysia during the working time of Kuala Lumpur/Singapore time zone (+8 compared to GMT). For the new issues, the dates in the column *Published* are the date of recording the news into our database, not the document date of issue. There could be one day difference for recording by A-System staff, or a couple of days in case of weekend, or more days in case of delayed publication by the Authority in their web site. Official beginning of recording was 1<sup>st</sup> January 2013.

When you open the page, by default you get the documents recorded in the last 7 days. The issuing authority is easily recognizable by its logo or country flag and its name in the first row of the document box. Just below the authority's name, the document type is shown with code, aircraft type affected and subject, if provided in the document. At the right side there is an icon that allows you to download the document or access the related authority web page (usually when there are many links).

At the left side a powerful system of filters is provided for your convenience in order to limit the list on the authorities and documents of your interest. You can select one or more authority, one or more document type and one period of time. Any combination of these filters are allowed. Please keep in mind that selecting *Any Day* without any other filter implies to load a great number of records.

Search: Boeing

Authority	Description	Published	Link
	<b>CASA Australia Airworthiness Notice</b> AWB 01-026 Issue 1 Unapproved Parts Warning – Externally Threaded Fasteners AN, MS, NAS & Cable (Boeing)	2012/12/20	
	<b>FAA Proposed Airworthiness Directive</b> FAA-2012-1229 The Boeing Company Airplanes	2012/12/20
